

DYNAMIC GLOBAL EQUITY

BOOST YOUR GROWTH

■ Capital magnification by playing the long-term global approach

Overview

Stock markets around the world, although being to some extent somewhat correlated, do also reflect the performance of local stocks listed thereon. And those may demonstrate performances in a totally uncorrelated manner to what is happening on stock markets on other continents. The advantage of investing globally is to tap into potential winners in several uncorrelated markets, to not only collect their gains, but also mitigate any potential local contamination effect and ensure continuous appreciation irrespective of regional or local depression. The Dynamic Global Equity Fund invests in equities on a global basis. The Fund Manager's approach is to be a long-term investor in its chosen stocks. It will not adopt short-term trading strategies. The Dynamic Global Equity Fund aims to offer investors an international equity exposure by investing in high quality and

Get exposure to Global Stocks
